Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 6 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Agar et al. (US 5,576,671). Figure 2 of Agar discloses an apparatus comprising;

first and second conductive lines (22s) having at least first and second coupled sections of unequal length, and a delay section (26) between the first and second coupled sections.

Allowable Subject Matter

2. Claims 9-30 are allowed.
3. Claims 2-5 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is an examiner's statement of reasons for allowance:

With respect to claims 2-5, the prior art does not teach the delay sections has a length associated with an operating frequency.

With respect to claim 8, the prior art does not teach delay loops.

With respect to claims 9 and 22, the prior art does not teach uncoupled sections.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
